

Interim Management & Project Development  
in the sector of  
Renewable Energies

- Shaping the energy transition
  - Creating a carbon footprint as a competitive advantage
- Strengthening the profitability and sustainability of your company

## **New business field successfully established and handed over**

After 8 months, the interim manager and his team had built up the new business area and integrated it into the group structure in terms of processes. The board was very satisfied with the results and entrusted the interim manager with the handover of the new business area to his operational successor in a permanent position.

### **The project in brief**

- Establishment of a business unit for industrial clients including sales organisation
- Work packages for sales, HR and M&A developed
- Product and sales strategy formulated
- Established a sales team with 15 full-time positions
- Shortlist for acquisitions and partners developed
- Successfully established and handed over a new business field
